Saginaw, Michigan, 48604. March 2009 – SWS-Trimac, Inc. continues partnership with Defense Contractor.

SWS-Trimac, Inc. has been performing EB-Welding and Machining of M60 Tank Engine Cylinders for the Defense Industry since late 2002; at that time the weld development and the creation of the required weld tooling took place. Since then thousands of engine-cylinders have been EB-Welded, machined, visually and radiographically inspected. This project is expected to be on going.
